

Research Capacity Building Workshops
RJH: Woodward Room, Begbie Hall – March 12, 2010
V/C is available to NRGH, if you are at another site please inquire ASAP
1:00 pm – 4:00 pm

***Navigating the Health Research Ethics Board
Application***

This workshop is primarily designed for researchers applying now or in the future, to the Health Research Ethics Board or the Joint UVic/VIHA Research Ethics Subcommittee. The workshop will also cover some ethical considerations that are common to many ethics applications. The first half of the workshop will focus on the ethics applications and the second half will be an open forum for research ethics questions.

Presented by: Kenna Miskelly, BSc, MA

Kenna obtained a BSc in biochemistry, with a minor in philosophy, and worked for a number of years in biochemistry and microbiology research and teaching labs. After completing her MA in philosophy, with a focus on applied ethics, she worked at the University of Victoria examining the ethical issues related to emerging genetic technologies. Kenna started as the VIHA Research Ethics Facilitator in 2007 and has found the position an excellent fit to her scientific training and her education in ethics.

Research Skills Workshops are an initiative of the VIHA Capacity Building Office, whose goal is to build research capacity with VIHA health professionals and decision makers, as well as building collaborative links with community, academic partners, other health authorities, and the Ministry of Health.
