

Make Prevention Contagious

DON'T LET THE FLU GET TO YOU

Double the fun, double the trouble! When one twin gets sick, the other is sure to follow. Parents Peter and Marcia from Squamish want the best for Hunter and Ryder. We can't cure the common cold but we can help prevent the flu. Help build immunity from influenza for you and yours.

The flu vaccine is available free for many people in BC, including young families and their caregivers. For the full list of who can get their flu shot for FREE, visit our website.
